

Notification 06/2016: AEE Exam Results and selection ratio

Several queries are received regarding date of declaration of result of AEE Screening Test and also the selection ratio. It is informed that efforts are being made to release the results in first week of December, 2016 and the dates of main examination stands good and there is no change. The selection ratio from screening test to main examination would be 1:50 with reference to the number of posts. It may also be noted that care is being taken while evaluating the cases of multiple hall tickets and the correct hall ticket numbers would be published on the website soon. It may also be stated that at this stage centre change is not permitted. Instances of candidates who have not passed the degree but appeared in the Screening test have also come to our notice. It may be informed to such candidates as well as other candidates who may not eligible due to criteria like over age, under age etc that they were allowed to sit in the examination based upon their self declaration. We are going to verify the data before main examination and if there is any mis-declaration or false declaration appropriate action would be taken under Regulation PME which is published in GOMS No: 385 of GA(Ser A) Department dated 18/10/2016.
